

FRACTION HERO!

A day before our most recent nor'easter, Mrs. Mitchell's class was online, via video conference, with the Challenger Learning Center in Rochester, NY. It was time to explore equivalent fractions. Professor Raab, from the Learning Center, guided us with fraction tiles and number lines, as Fraction Hero and Pizza Pirate actively ate pizza slices, providing the fractions we compared!

We all learned more about comparing fractions and finding fractions on a number line. These hands on tools and the videos we watched, as part of the conference, helped us visualize equivalent fractions, which are an important part of the NYS third grade curriculum. Perhaps Fraction Hero will invite us out for pizza next time, so we can continue to explore equivalent fractions!

Thank-you Mrs. Pesiri, for your help contacting the Learning Center! Mrs. Mitchell
